Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: The Examiner explains DOCSIS cable modem clearly meets the limitation "enclosed one or more downstream signal as the Pulse Code Modulated data signal" because the PCM is standard in DOCSIS. Moreover, due to the bi-directional voice communication (VOIP) in using DOCSIS cable modem (VOIP), Sala's burts (PCM) is used, i.e., one for upstream conversation and one for downstream conversation for voice telephone over the network between two users. As to "without application-level packet headers" this limitation is clearly met by Gummalla sect 0052-0054 and Fig. 3.

A handwritten signature in dark ink, appearing to read "HAITRAN", is written over two horizontal lines.
